

Tuesday, October 9, 2018 7:00am-9:00am

**City Club Los Angeles** 555 S. Flower Street, 51st Floor Los Angeles, CA 90071

The Public Private Partnership (P3) model is used to describe a variety of contractual relationships between public clients and the private development community to design, build, operate, finance and/or maintain assets. In essence, there are multiple variations that constitute a P3. So, which variation is right for my project? Due to the growing use of P3 as a procurement method, clarity around what constitutes a P3 and when this process can be used for optimal results is a topic public clients are exploring. The experienced panelists will address multiple facets of the P3 space including: What defines a P3 project? How is P3 delivery used to further public goals? Which P3 approaches are institutional clients using and why? What factors should be considered when selecting P3 delivery model for a project?
