From early California seafarers trading their goods to our present day modern high-rise dwellings, research and development centers, walkable TOD's, tourism and recreation, our region's waterfronts are undergoing extraordinary transformations that involve the investment of billions of dollars of both public and private funds. This program will offer insights into the real estate development deal structures, the visionary land-use planning, and related design and construction opportunities occurring in our region's bays and harbors. Our panelists include representatives from both non-profit and private sectors who are at the center of some of the most exciting developments in California!
